Caveats:

- 1 Data is reflective of activity at the point of survey completed in May 2019 and based on the 18/19 irrigation season.
- 2 Dairy includes all of the dairy land use categories including 'Dairy' (WUL with an active milking shed), 'Dairy Associated' (land linked to an active dairy shed WUL) and 'Dairy Agistment and Fodder' (no clear link to an active milking shed but dairy cattle present or a former active dairy farm that may be in transition).
