

# WASTE NOT GETTING THE MOST FROM YOUR DAIRY EFFLUENT

**Dairy effluent is a valuable source of nutrients - learn how to make the most of it on your farm.**

Explore different effluent management options, including composting, fermentation and biogas at this free workshop presented by composting pioneer and dairy farmer Tony Evans.

*What you'll learn:*

- Pros and cons of different systems
- How to get the best out of the organic resources on a dairy farm
- How much extra nutrient is really required on a dairy farm

*All welcome! Booking essential.*

This event is supported by Agriculture Victoria's Drought Support Package and by the Australian Government through funding from the Natural Heritage Trust under the Climate-Smart Agriculture Program.
