

SHELTERBELTS

for livestock

Join our farm field day to discover how shelterbelts can increase farm production, improve biodiversity, reduce your carbon footprint and diversify income through agroforestry.

You'll learn practical tips from farmers Carmen Lee and Gerard Condon, who've planted extensive shelterbelts across their cattle property.

Plus, discover more about shelterbelt design, tree species selection, and funding opportunities including the Victorian Trees on Farms program.

All welcome - please register.

The Victorian Carbon Farming Outreach Program is delivered with funding support from the Commonwealth of Australia through the Department of Climate Change, Energy, the Environment and Water under the National Carbon Farming Outreach Program.

We acknowledge and pay our respects to the Traditional Owners of this Country, the Gunaikurnai and to their rich culture and spiritual connection to Country.
